Chair: Magda Nico (CIES-IUL)
Distance and Similarity in Sequence Analysis,
by Cees Elzinga (University of Amsterdam)

14h30 – 18h00 | Portuguese Methodologies and Results

OPEN CALL (afternoon session)

Methodological eclecticism and openness is part of the Portuguese sociological DNA. This is even more so in sociological fields with long presence, protagonism and history in the Portuguese Society, such as the Sociology of the Family.

The goal of this afternoon session is to put this long lasting but ever changing "Family-Life Course" thematic and analytical partnership in the center of the discussion of contemporary changes and dynamic of family lives, formation and social trajectories.

We are hereby delighted to invite you to submit an abstract (up to 500 words) to magda.nico@iscte.pt or familias@aps.pt with empirical results or methodological discussion on the families and life course. The deadline for this submission is **September 25th** (results will be known by **October 1st**). The abstract and presentation is to be made in English language.

The selected participants will present a 20 minutes communication at this international seminar.
