# Undocumented migrants health and access to care in Sweden

Undocumented migrants (UMs) in Europe constitute a heterogeneous group. They are typically in a vulnerable and marginalised situation, since most of them have exhausted their options for gaining asylum and protection from war and persecution, many are traumatised and fear disclosure and deportation, and they typically lack basic social security. The present study investigates living conditions, access to human rights and mental health of UMs living in Sweden.

### Apresentação

**Lena Andersson**

Department of Social Work,  
Göteborg University, Sweden
